# WHAT IS SMART CONTRACT ?

A smart contract is a self-executing program on a block chain that automatically enforces and performs an agreement's terms when predefined conditions are met. It  eliminates the need for intermediaries, ensures transparency and security, and reduces costs by automating processes.

So let’s understand, how Smart Contract is going to make BULLPOL ,POL (MATIC) Affiliate Program Robust & Different from all the other Centralized platforms in the market.

# WHAT IS POL ?

POL (previously known as MATIC) is the native token of the Polygon network . Polygon is a layer-2 scaling solution for Ethereum, designed to improve transaction speed and reduce costs while maintaining security.

The upgrade from MATIC to POL was initiated to reflect the expanded utility and vision of the Polygon network. POL serves as the native gas token for transactions on the Polygon PoS (Proof of Stake) network and is used for staking and governance within the ecosystem.

In essence, POL is a utility token that plays a crucial role in securing the network, enabling governance, and providing access to exclusive services within the Polygon ecosystem.

AUDITED WITH CERTIK

BULL POL

# WE ARE AUDITED WITH

CERTIK

CertiK is a company that offers smart contract audit services. Their audit reports are comprehensive, transparent, and free to the public. They are classified by severity, from informational to critical, and can provide evidence that a project takes security seriously. CertiK's audits are used by top exchanges like Binance, OKEx, and Huobi.
